

Universal change-over switch ▶ LW26 series universal change-over switch

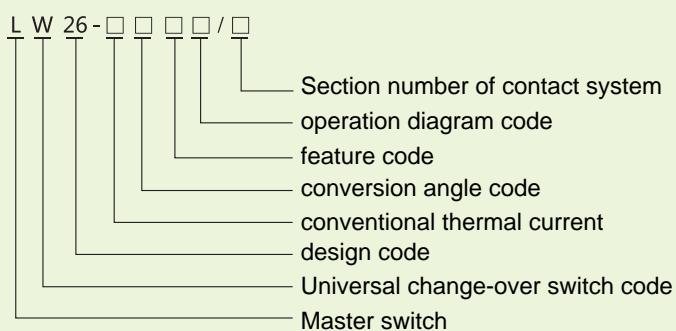

▶ Application

LW26 series universal change-over switch is applicable for circuit of AC50Hz, rated operational voltage 690V and below, DC voltage 240V and below, rated current up to 100A and manual connect and break circuit unfrequently. And it also can control low-capacity AC motor directly and circuit measuring. LW26 series switch has the advantages of compact structure, multi-functions, nice design, good insulation, flexible operation, safe.

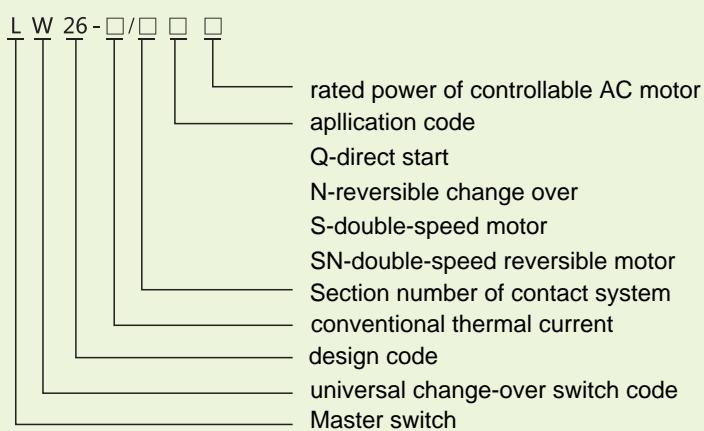

▶ Model No.

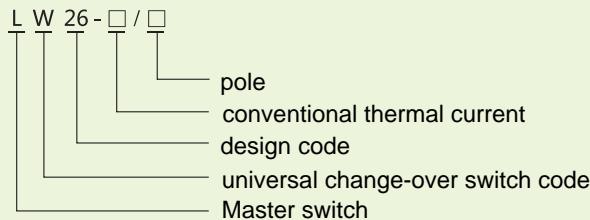

2.1 For Master control

2.2 For motor control

2.3 For motor direct control

▶ Normal working condition and installation condition

3.1 Altitude: lower than 4000m.

3.2 Ambient temperature: no higher than +50°C, and no lower than -25°C, and day average temperature shall no more than +35°C.

3.3 Humidity: Relative humidity shall not exceed 50% at the Max temperature, and higher humidity could be accepted at lower temperature.

The condensation must be taken care which is caused by temperature change.

▶ Feature

4.1 Application: for main circuit transfer, motor direct control and master control and measuring.

4.2 Operation mode: fixed position type, Auto-reset type, fixed position and Auto-reset type

4.3 Section number of system: fixed position type has 1 to 18 sections (63A has 8.), Auto-reset type has 1 to 3 section, motor direct control has 1 to 6.

4.4 Conversion angle: 30°, 45°, 60°, 90°

4.5 Panel shape: square, rectangle, round

4.6 Operation mode and operation position

▶ Main Technical data

Table1

Model No.	LW26-20			LW26-25			LW26-32			LW26-63			LW26-125			LW26-160	
Rated insulation voltage U_i (V) 690V
