

COMPLETE SETS OF EQUIPMENT

MNS-E

series low-voltage dynamic distribution and control boxes(Authorized by ABB)

Hanging Box

Floor Box

Floor Box

Overview:

MNS-E series low-voltage dynamic distribution and control boxes shall conform to IEC60439, GB7251, BSEN60439 and AS3439 international standards. Installation and connection of system shall be carried out according to IEC60364 and DINVDE0105 standard.

MNS-E series low-voltage dynamic distribution and control boxes shall adopt standard modularized design, which shall be compact in box structure and strong in commonality. Width, height and depth of box can be arbitrarily extended according to standard module (E=25mm).

MNS-E series low-voltage dynamic distribution and control boxes shall adopt full-metal case and cabinet door shall adopt glazed door or metal door with an opening angle of 180° ; Box's installation method shall be suspending box and floor □type box, of which, suspending box shall adopt 1.5mm high quality cold-roll steel sheets and grounding box shall adopt 2mm high quality cold-roll steel sheets. Box type can be divided into split mounting type or welded type. The whole box shall adopt epoxy resin powder electrostatic spraying and matt treatment. With RAL7035 light gray as the case color, RAL2000 yellow-orange as interior electric mounting plate color, matching with black door lock and hinge and unique label design, which all make the integral color elegant and beautiful.

Protection level of MNS-E series low-voltage dynamic distribution and control boxes is IP30-IP54.

It's ABB's commitment and mission for customers to pursue innovation and perfection. MNS-E series low-voltage dynamic distribution and control boxes are perfection and supplement products on the basis of ABB low-voltage distribution box products (terminal distribution, three-phase distribution box, dynamic distribution box, distribution switch box), which enables ABB to have complete product chain of low-voltage distribution box product and cover the distribution boxes needs of all industries.

MNS-E

series low-voltage dynamic distribution and control boxes(Authorized by ABB)

Floor box(glass door)

Smisline diagram

Outdoor Box

Structure highlights:

- Standardized design, compact structure and strong commonality
- Arbitrary changes of three-dimensional measurements according to requirements
- 180° opening angle of cabinet door
- Box can be split mounting type or welded type
- Electric mounting plate can be dismantled separately
- Unique characteristics of label design
- Elegant and beautiful color assortment

Scope of application:

- Electric motor start control
- General water pump control
- General draught fan control
- Other electric motor control
- Dynamic distribution
- Dual power switching distribution

Application fields:

- Municipal public and commercial buildings
- Telecommunications/ information, electronic industry, consumption goods
- Rail transit, airport, harbor/ ship
- Petroleum, chemical industry, electric power construction
- Manufacturing industry, tobacco industry
- Metal, mining industry, cement, paper industry

Environmental temperature:

Short-time maximum temperature: +40℃

24-hour maximum average temperature: +35℃

Minimum temperature: -5℃

Capacity of equipment shall be reduced when running in temperature higher than the above environmental temperatures. And working conditions for measuring, metering device and protective relay shall conform to regulations of manufacture.

COMPLETE SETS OF EQUIPMENT

MNS-E

series low-voltage dynamic distribution and control boxes(Authorized by ABB)

Environmental conditions:

When in normal working, climate environment shall conform to Part 500's regulations of IEC60439, EN60439 and VDE0660. When surrounding temperature is in 40°C, relative humidity shall be 50%. If box is installed in place where the elevation is higher than 2000m, the equipment shall be running with corresponding capacity reduction.

Box parameter:

Standards to conform to: GB7251.1 and GB7251.3

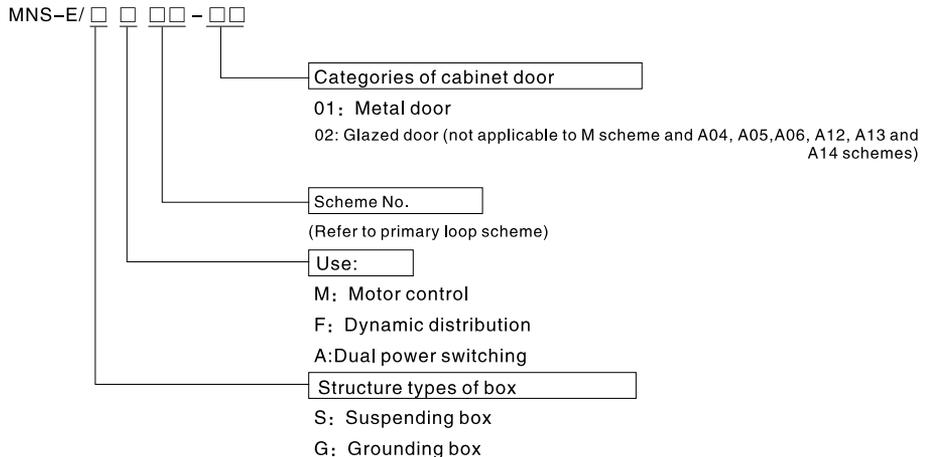

Insulation voltage: $\leq 1000V$

Working voltage: $\leq 690V$

Maximum operating current: 400A (suspending box)
630A (grounding box)

Protection level: IP30/IP40

Type explanation:

MNS-E

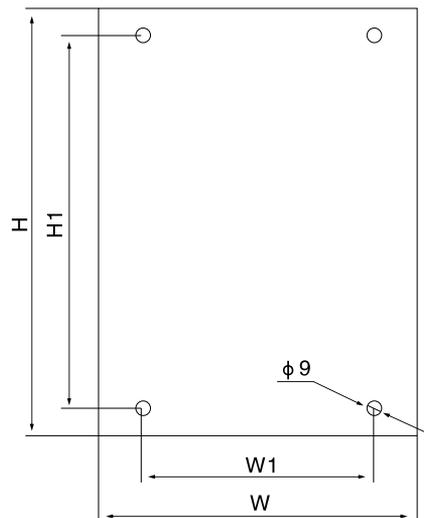

series low-voltage dynamic distribution and control boxes(Authorized by ABB)

Contour dimension:

Contour dimension	Suspending box	Grounding box
Width	400-900	400/600/800
Height	550-1000	1600/1800/2000
Depth	175-300	350/400/450/500

Width, height and depth of suspending box can be arbitrarily extended according to standard module.
Module E=25mm

Installation dimension drawing(mm)

Installation method	Hanging Box	Hanging Box
MNS-E type	MNS-E/SM72	MNS-E/SM73

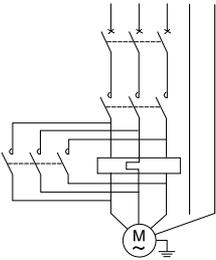

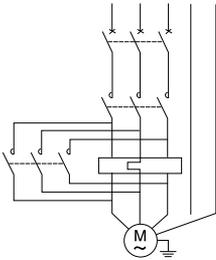

* When draught fan starts directly, tripping time of thermal overload relay with 30-grade can be followed (no longer than 9s)

Start frequency: when in 80% load factor, it's ≤ 15 times per hour.

when in 50% load factor, it's ≤ 30times per hour. Grounding box
